

ClimateCart

What's the CO₂ of your groceries?

Scan your supermarket receipt and see the carbon footprint of every product.

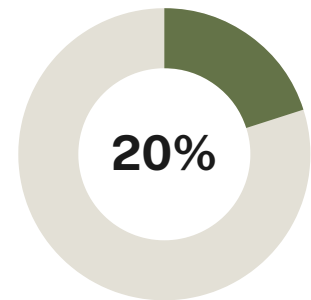

We're spending 4× our climate budget

Carbon footprint per person per year

Average resident of Belgium (own consumption)

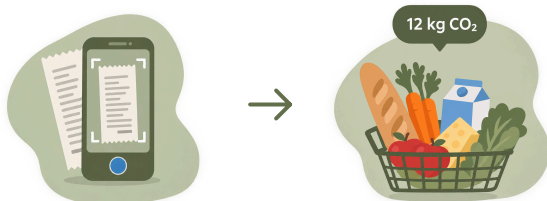

1.5 °C budget (Paris Agreement)

Food is **about 20%** of the carbon footprint

Photograph your receipt

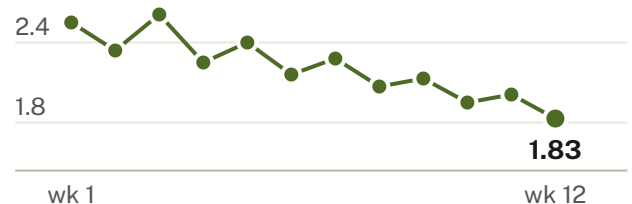

Take a photo of your paper receipt, or upload a PDF receipt.

See the kg CO₂ of every product and of your whole basket.

Follow your footprint over time

kg CO₂ per kg of food, per week (example)

✈ **178 kg CO₂** of groceries ≈ **2.5× a flight** Brussels–London
